Introduction

The list which follows comprises unclassified publications dealing in whole or significant part with Marine Corps operations and related matters in the Korean War. For contextual reference a number of general works have been included as well.

In order that the list have the widest possible value to the largest number of researchers and writers, criteria for selection of items to be listed have been broad. Inclusion of any given title does not, therefore, necessarily constitute Marine Corps acceptance or endorsement of an author's views, conclusions, or, indeed, complete historical accuracy. By the same token, the annotation supplied is in the nature of description of the content of books and articles rather than a critical evaluation.

The annotation "notes" indicates that the publication is documented as to research sources; "bibliog." indicates that a bibliography of research materials is appended.

The cut-off date for entries in this bibliography is 31 December 1968.
